

SINGLE DOOR

HARDWARE SYSTEMS

A single barn door system provides both originality and efficiency. Eliminate dead space created by the swing of a traditional door, join two rooms into a single adaptable space, and create privacy while adding architectural value. Delivering superior performance, and supporting doors weighing up to 550 lb., Krownlab hardware allows you to explore a broader range of materials, applications and door designs than ever before.

- Up to 550 lb. standard weight capacity
- Industry-leading installation adjustment
- Unlimited continuous track lengths
- For drywall, glass, concrete, and steel
- Fully concealed attachment points
- Broad range of styles and finishes
- ADA compliant pull force
- For wood, glass, resin, and steel panels
- Proudly made in the USA

Hawke's Bay home in New Zealand and Falls City Residence in Louisville, KY. Featuring Oden Top Mount in Brushed Stainless and Baldur Top Mount in Brushed Stainless.

BI-PARTING DOORS

HARDWARE SYSTEMS

- Up to 550 lb. standard weight capacity
- Industry-leading installation adjustment
- Unlimited continuous track lengths
- For drywall, glass, concrete, and steel
- Fully concealed attachment points
- Broad range of styles and finishes
- ADA compliant pull force
- For wood, glass, resin, and steel panels
- Proudly made in the USA

Bi-parting barn doors are the perfect solution for high traffic spaces and large openings without wall space for a single door. Krownlab hardware systems can be seamlessly connected, allowing a continuous track for any bi-parting door application. A unique patented feature provides vertical adjustment for a tight, even gap when the doors are closed.

OFS Brands showroom conference space, Los Angeles, CA. Featuring Oden Glass Mount in bi-parting configuration and Black Stainless finish.

BYPASSING DOORS

HARDWARE SYSTEMS

- Comprehensive technical support provided
- Industry-leading installation adjustment
- 12' continuous track length
- Stack doors within the opening or to the side
- Fully concealed attachment points
- Broad range of styles and finishes
- ADA compliant pull force
- For wood, glass, resin, and steel panels
- Proudly made in the USA

Krownlab has the most flexible range of bypassing barn door hardware in the industry. These elegant systems are free of unsightly wall and ceiling brackets, require the least amount of wall space, and allow access to either side of an opening. Doors can be stacked within the opening or out of the way to one side. Our comprehensive technical support includes site specific drawings to ensure a perfect fit.

Monte Vista House, Portland, OR. Featuring Oden Face Mount in bypassing configuration and Brushed Stainless finish.

OVERSIZED DOOR HARDWARE SYSTEMS

- Up to 550 lb. standard weight capacity
- Industry-leading installation adjustment
- Unlimited continuous track lengths
- For drywall, glass, concrete, and steel
- Fully concealed attachment points
- Broad range of styles and finishes
- ADA compliant pull force
- For wood, glass, resin, and steel panels
- Proudly made in the USA

Oversized doors make an impactful statement in any interior. Allow a space to be completely opened or divided without the significant dead space created by traditional hinged or pivoting doors. Krownlab's barn door hardware systems support doors weighing up to 550 lb. and 3" in thickness. Take advantage of a new level of design freedom.

MINIMAL conference room, Chicago, IL. Featuring Oden Top Mount in Brushed Stainless finish.

FRAMELESS GLASS

HARDWARE SYSTEMS

- Up to 550 lb. standard weight capacity
- Industry-leading installation adjustment
- Unlimited continuous track lengths
- For drywall, glass, concrete, and steel
- Fully concealed attachment points
- Broad range of styles and finishes
- ADA compliant pull force
- Compatible with 3/8" to 3/4" glass
- Proudly made in the USA

Frameless glass panels completely open up a space and increase light ventilation while keeping noise pollution in check. Krownlab has a comprehensive range of barn door hardware systems in an array of finishes specifically designed for frameless glass. Supporting monolithic and laminated glass weighing up to 550 lb. and 3/4" in thickness, the design possibilities are endless.

Skylab Architecture's office, Portland, OR. Featuring Baldur Glass Mount in Brushed Stainless finish.

MULTIUSE DOORS

HARDWARE SYSTEMS

- Up to 550 lb. standard weight capacity
- Industry-leading installation adjustment
- Unlimited continuous track lengths
- For drywall, glass, concrete, and steel
- Fully concealed attachment points
- Broad range of styles and finishes
- ADA compliant pull force
- For wood, glass, resin, and steel panels
- Proudly made in the USA

Krownlab barn door systems are a smarter way to optimize multiuse spaces. They can reveal one area and conceal another to maintain both privacy and flexibility. Seamlessly connected tracks allow doors to perform multiple functions and create a highly adaptable interior space.
