KOR TOWEL BAR - INSTALLATION INSTRUCTIONS

WALL MOUNT

(!) Mounting Point hardware must be secured to structurally solid material.

① Installation onto drywall: Core out ½" hole for Drywall Insert. For installation onto structurally solid material, skip to Step 3.

② Use provided Drywall Shims to ensure that Drywall Insert is installed flush with finished surface.

③ Predrill and install Mounting Point assembly as shown, ensuring that Cone-head Plate is structurally supported.

④ Softly tighten Mounting Screws to 48 inch-lb. (4 ft-lb.) or less to avoid crushing substrate material.

⑤ With Towel Bar firmly pressed up against Surface Plate, softly tighten Set Screws to 30 inch-lb. (2.5 ft-lb.).
