

REQUIRED DOOR OPENING INFORMATION

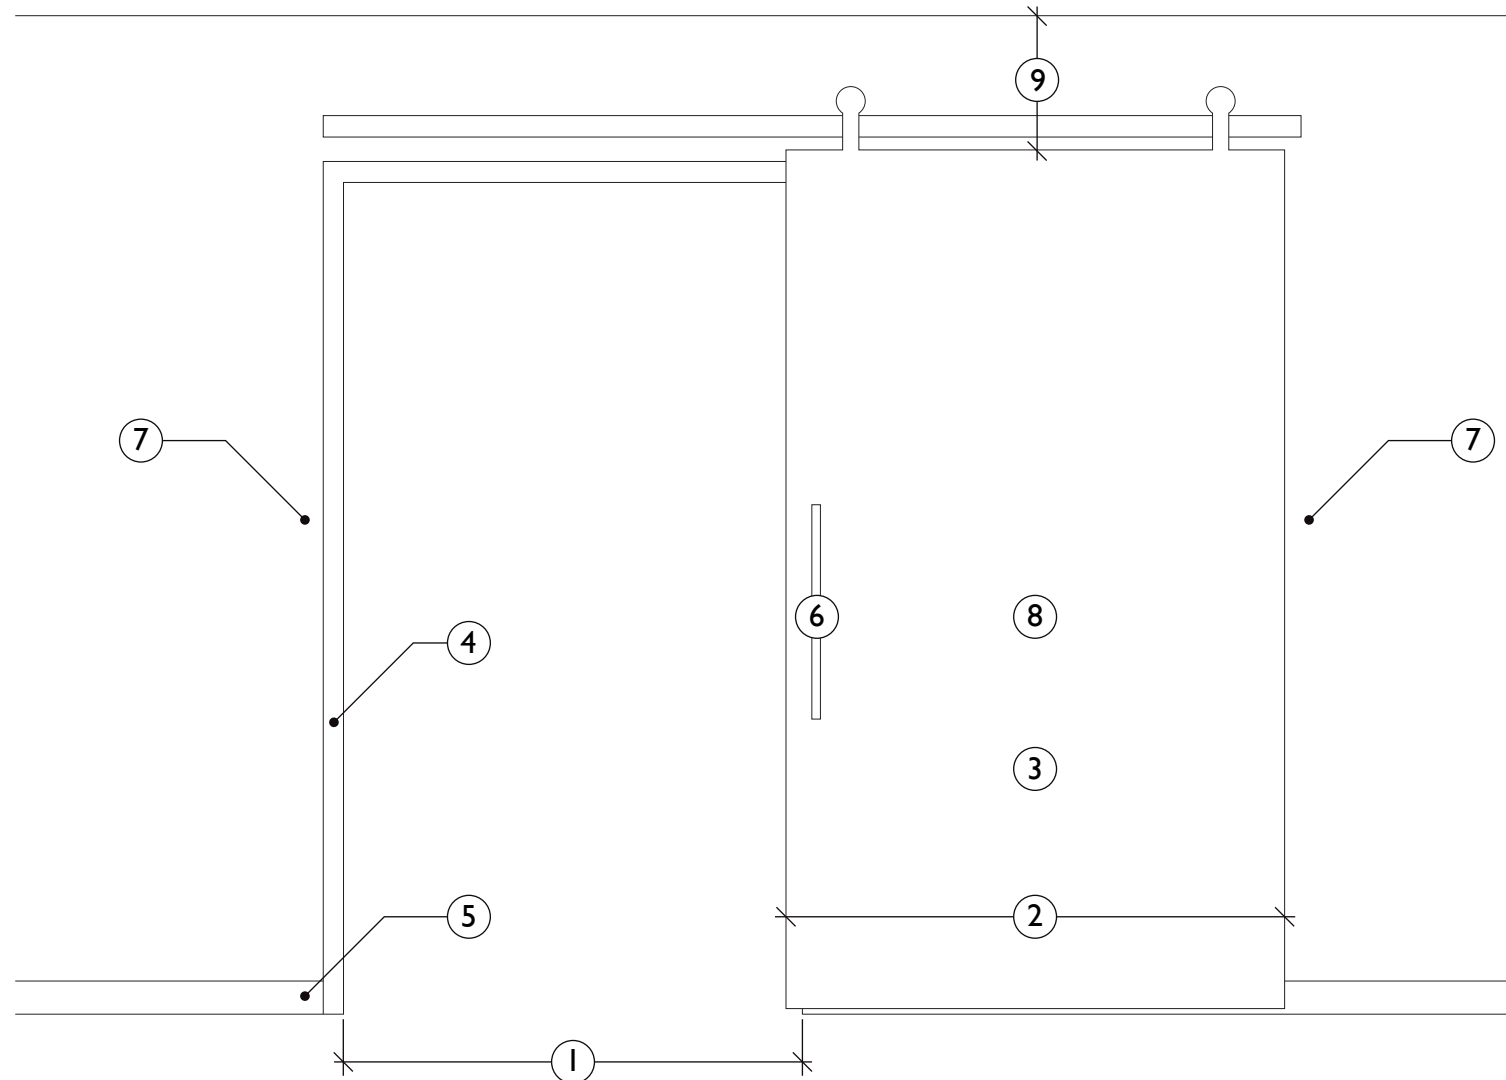

For single doors

- ① What is the door opening width? *
- ② What is the door panel width? *
- ③ What is the door panel thickness? **
- ④ Does the opening have door trim? If so, how thick is it?
- ⑤ Does the wall have base molding? If so, how thick is it (including base shoe if applicable)?
- ⑥ Will you be using a door pull? If so, what is the make and model?
- ⑦ Is there a perpendicular wall or any other obstruction immediately adjacent to this door installation? If so, what and where is it?
- ⑧ Verify that your door panel weight does not exceed the maximum allowable weight per product chart below.
- ⑨ Verify that you have enough clearance between the top of the door panel and the ceiling per the product chart below.

* Critical & required information

** See Panel Clearance Guide for door thickness and weight constraints, available at krownlab.com/downloads

	Max. door panel weight	Min. above door panel clearance
Baldur	300 - 400 lb. **	8"
Ragnar	400 lb.	7"
Oden	300 - 400 lb. **	7"
Rob Roy	150 lb.	7"
Axel	200 lb.	5"

REQUIRED DOOR OPENING INFORMATION

For bi-parting doors

- ① What is the door opening width? *
- ② What is the door panel width? *
- ③ What is the door panel thickness? **
- ④ Does the opening have door trim? If so, how thick is it?
- ⑤ Does the wall have base molding? If so, how thick is it (including base shoe if applicable)?
- ⑥ Will you be using a door pull? If so, what is the make and model?
