

PREPARE DOOR PANEL FOR FLOOR GUIDE POST

- ❗ If the order includes a floor guide channel, reference those separate installation instructions instead.
- ① Prepare the door for the floor guide post by routing the bottom of the door panel along its entire length as shown.
- ❗ If the door panel overlap is 2" or more, it is possible to conceal the routed channel by terminating it short of the door panel edges.
- ② Return to the main installation instruction document.

INSTALL FLOOR GUIDE POST

- ③ With the door in the desired closed position, mark the leading edge of your door panel.
- ④ With the door in the desired open position, mark the trailing edge of your door panel.
- ⑤ Temporarily move the door panel beyond the fully open position, revealing the overlap area.
- ⑥ Install the Door Guide Post in the overlap area.
- ❗ Position it at the appropriate distance from the wall so that the door panel hangs plumb.
- ⑦ Gently engage the door panel with the door guide post.
- ⑧ Return to the main installation instruction document.

⚠ Installation of a floor guide is mandatory. Door panel has to be engaged by the floor guide along its entire travel. Not following the above instructions can cause a hazardous condition.
